ABOUT CONFERENCE

We extend a hearty welcome to all for the Puducherry Eye Con 2025, or Cherry Con'25.

The Tamil Nadu Ophthalmic Association (TNOA) is an officially registered State Association for Ophthalmologists in Tamil Nadu. Established 70 years ago, it boasts almost 4,000 members, making it the largest State Ophthalmic Association in India.

It is affiliated with the All India Ophthalmological Society (AIOS).

Cherry Con'25 is the 72nd Annual Conference of TNOA, scheduled to take place on 1st, 2nd, and 3rd August 2025 at Suganya Convention Centre and Hotel Sunway Manor, Puducherry.

A Silent Revolution – The “Silent Conference”!

For the first time in TNOA's history, the Local Organizing Committee (LOC) will host the conference as a “Silent Conference”, Multiple podia will be set up in one large hall. Delegates will use headsets and remote controls to tune into their chosen sessions without moving between halls. This novel concept ensures seamless learning in a unique setup. The conference expects to host over 2,000 ophthalmologists from Tamil Nadu and across India.

Scientific Excellence

The Scientific Committee is curating top-notch sessions, featuring renowned International, National, and Regional Speakers who will share valuable insights and experiences. Sessions designed especially for Young Ophthalmologists (open to all):

Would make learning crisp and exciting....

Breakfast with Experts

Ophthalmic Puzzles & “Empty Your Bucket” (which replace misconceptions with correct knowledge),

**The interesting Ophthalmic Premier League (OPL),
Court Martial,**

Debates on Pros & Cons

Quizzes – Ophthalmic and Non-Ophthalmic, would definitely enthrall you!

Revival of JAM – Just a Minute

POA's brainchild: Shark Tank

ABOUT CONFERENCE

Additionally, over 100 trade partners will showcase cutting-edge equipment, instruments, and the latest pharma products in the trade area. Explore Iconic Puducherry Puducherry, formerly known as Pondicherry or Pondy, is a famous tourist destination with landmarks like:

Sri Aurobindo Ashram-Auroville
Beaches-Chunnambar Boat House
Museum-Basilica
French War Memorial-Arikamedu
Lighthouse, and more.

The conference balances work and recreation for the holistic health of delegates, featuring:

Ophthalmologists Got Talent on Friday.

French Zumba Warm-up at Rock Beach, followed by a Heritage Walk around iconic landmarks on Saturday morning & A Gala Banquet Dinner with world-class entertainment on Saturday night & much more

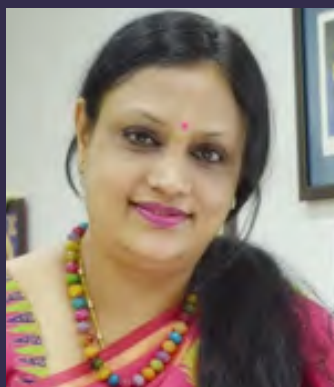

Warm Welcome to
Cherry Con'25!

MESSAGE FROM ORGANISING CHAIRMAN

Dr. R. Venkatesh

Dear Colleagues and Delegates,

Welcome to the Tamil Nadu Ophthalmic Association Annual Conference 2025 (CherryCon'25) in Pondicherry!

This year's conference promises to inspire, educate, and foster collaboration among ophthalmic professionals. I am sure all the delegates will benefit from the Renowned speakers and interactive workshops Engaging panel discussions and networking opportunities Cultural events and activities. Join us in August 2025 to enhance the quality of eye care and shape the future of ophthalmology!

Looking forward to welcoming you to Pondicherry!

MESSAGE FROM ORGANISING SECRETARY

Dr. Vanaja Vaithianathan

Bonjour!

Warm greetings from the Pondicherry Ophthalmologists' Association (POA) and the Local Organizing Committee (LOC) of the 72nd Annual Conference of TNOA – Puducherry Eye Con 2025, sweetly cherished as Cherry Con'25!

We are delighted to welcome you to Puducherry — a land where serenity, spirituality, and scenic charm come alive, blending beautifully with science, innovation, and cultural celebration. This year's conference is an inspiring fusion of inclusivity, ingenuity, and interaction, set against a unique French backdrop, ambience and hospitality. Our journey begins with Pre-Conference Sessions on Thursday, 31st July, tailored for both Doctors and Paramedical Staff, followed by a focused Practice Development Workshop to empower your clinical and entrepreneurial aspirations. The Grand Inauguration Ceremony will be graced by the Hon'ble Lieutenant Governor of Puducherry, alongside our Guests of Honour – Dr. Harminder Dua and Dr. Partha Biswas, President, AIOS. The evening culminates in "Ophthalmologists Got Talent" – a vibrant celebration by and for our talented fraternity. For the first time in TNOA history, you will experience the path-breaking "Silent Conference" format – delivering multi-track scientific sessions using wireless headphones and personal channel selection. Stay seated, stay focused – knowledge without noise!

While Halls Auroville & Bharathi Park remain non-silent, the Silent Halls – Chunambar, Dupleix Statue, Eden Beach, and French War Memorial (Halls C, D, E, F) – redefine the conference experience.

The Scientific Committee proudly presents:

A stellar blend of International, National, and Regional faculty, Symposia, Panels, Clinical Updates Quizzes, Puzzles & the most sought OPL, where science with fun and entertainment awaits you.

Ophthalmology in Tamil, Unique sessions like Shark Tank, JAM, Empty Your Bucket, and Breakfast with Experts, Instruction Courses with Wet & Dry Lab Hands-On Training With over 100+ Ophthalmic Stalls, you can explore the latest advancements in ophthalmic equipment, technology, and innovation — from diagnostics to surgical tools. In addition, a vibrant array of non-ophthalmic stalls will offer something for everyone, creating a dynamic exhibition space full of discoveries and networking opportunities.

To make Cherry Con'25 a family-friendly experience, we've thoughtfully planned engaging activities for spouses and children, including yoga, fitness sessions, and interactive events — ensuring that while you immerse in science, your loved ones stay active, entertained, and inspired!

Beyond academics, experience the soul of Puducherry – begin your Saturday morning with Zumba at Port Amphitheatre, followed by Heritage Walk at Rock Beach with health conscious refreshments. The go green commitment to sustainability through eco-friendly conference practices will stun and surprise you.

Keep an eye out for our cheerful squirrel mascot, Puducherry's State Animal, who will guide you with a smile throughout this memorable conference!

Don't miss the Banquet Dinner at Santho Lawn – an unforgettable evening of world-class entertainment, culinary delights, and fellowship under the stars.

Join us to Collaborate, Comprehend, and Create the Ophthalmology of Tomorrow, Today.

Let's celebrate the spirit of Cherry Con'25 – where science meets soul...

**Bienvenue à Cherry Con'25 !
Welcome to Cherry Con'25 !**

MESSAGE FROM SCIENTIFIC COMMITTEE CHAIRMAN

Dr. Nirupama Kasturi

Greetings from the Scientific Committee,

It gives me immense pleasure to welcome all of you to the 72nd State Tamil Nadu Ophthalmology conference, "CHERRYCON 2025". We are thrilled to host this conference at Puducherry where the academic spirit will meet the Tamil culture in the vicinity of the shore.

This year we have received abstracts for around 533 Free papers, 475 posters, 70 Instruction courses, 10 Hands-on instruction courses, 100 videos, 96 JAM, 32 Innovations, 37 PG theses, and 22 PG quiz team submissions. The conference highlights are a Go Green initiative, Silent Halls experience and interesting sessions like the Ophthalmic Premiere league, Court Martial, Breakfast with experts and a Fun quiz with crosswords and connexions.

The scientific program is designed to provide ample learning opportunities in all subspecialties through interesting plenary sessions, instruction courses, debates, and skill transfer sessions over 3 days in 133 hours spread across the halls in Suganya convention centre and Sunway Manor.

I am thankful to the TNOA executive committee for all their input, especially Dr Sujatha Mohan, Dr Sriram Gopal, and Dr Atheek Shaik. I also thank Dr Manoj Vasudevan, Scientific Chairman of last year's conference, CHEN-EYE CON 2024 for his guidance.

I extend my sincere gratitude to Mr. Sai Krishnan, Mrs. Manjula, and the entire team at Numero Technologies for their exceptional coordination in managing the abstract submissions, overseeing the evaluation process, and meticulously organizing the sessions in line with the schedule.

A special mention about the hard work put up by the scientific committee coordinators in curating an excellent program and the Organising Chairman- Dr Rengaraj Venkatesh, and Organising Secretary- Dr Vanaja Vaithianathan, for their constant support, enthusiasm and positivity throughout.

We look forward to seeing you at the CHERRYCON 2025!

Dr Nirupama Kasturi

OUR TEAM — LOCAL ORGANISING COMMITTEE

SCIENTIFIC COMMITTEE

Scientific Committee Chairman: Dr. Nirupama Kasturi

Scientific Co-Chairman: Dr. Geeta Behera

Scientific Committee Members:

1. Cataract: Dr. Sudha, Dr. Senthamizan Rene, Dr. Subashini K, Dr. Ramesh Babu K, Dr. Vanaja Vaithianathan, Dr. Thanickachalam

2. Glaucoma: Dr. Subashini K, Dr. Kavitha S, Dr. Karthikeyan Mahalingam, Dr. Venipriya, Dr. Geeta Behera, Dr. Swati Upadhyay, Dr. T. Vijhaya Priya

3. Cornea & Refractive: Dr. Josephine Christy, Dr. Geeta Behera, Dr. Naveen, Dr. Niruban, Dr. Kunal Mandlik, Dr. Amudha P, Dr. Vanaja Vaithianathan, Dr. Subashini, Dr. Ramesh Babu K, Dr. Mohammed Asif Ibrahim

4. Retina: Dr. Amit Kumar Deb, Dr. Manavi D Sindal, Dr. Shreyas Temkar, Dr. Ezhilvathani, Dr. Ashok Kumar

5. Uvea: Dr. Balamurugan, Dr. Shreyas Temkar, Dr. Sivaranjini, Dr. H. Sivakumar, Dr. Ezhilvathani

6. Paediatric Ophthalmology and Squint: Dr. Veena K, Dr. Nirupama Kasturi, Dr. Fredrick Mouttapa, Dr. Karunanithi, Dr. Jayasri P

7. Neuro-ophthalmology: Dr. Balraj, Dr. Hannah Ranjee, Dr. Annapurna Kumar, Dr. Karthikeyan Mahalingam

8. Orbit and Oculoplasty: Dr. R. Jayagayathri, Dr. Bhagwati, Dr. Dayakar, Dr. Rajalakshmi Selvaraj, Dr. Loganathan

9. Comprehensive Ophthalmology and Special sessions: Dr. T. Vijhayapriya, Dr. Swathi. N, Dr. Venipriya, Dr. Rajalakshmi A.R, Dr. Srikanth Krishnagopal, Dr. Annapurna Kumar, Dr. Susil Pani, Dr. Arokiam John Bosco, Dr. Kalaiselvi

CONFERENCE HIGHLIGHTS

▶ **AI Hub**

Dive into the future with cutting-edge discussions on Artificial Intelligence in ophthalmology.

▶ **Breakfast with Experts**

Start your day right with intimate, high-impact conversations over breakfast.

▶ **Court Martial Session**

Witness heated trials of controversial clinical decisions-are you the judge or the jury?

▶ **Debates**

Face off on the hottest topics in eye care, because every perspective matters!

▶ **Eye-Spy Fun Quiz**

Sharpen your clinical wit and win glory in this fast-paced, entertaining quiz showdown.

▶ **Go Green Initiative**

A sustainable conference experience with eco-friendly practices at every step.

▶ **Ophthalmic Premier League**

It's not just cricket! Watch top teams battle it out in high-stakes clinical face-offs.

▶ **Hands-On Instruction Courses**

Get your hands into action with focused surgical skill-building sessions.

▶ **Shark Tank for Innovations**

Pitch or witness brilliant ophthalmic innovations to a panel of expert "sharks".

▶ **Silent Halls**

Experience a new era of learning with wireless headsets-zero noise, maximum focus.

▶ **Talent Show by Ophthalmologists**

Discover the hidden artists behind the scalpel, music, dance, drama and more!

▶ **Video Assisted Skill Transfer Sessions**

Learn from real surgical videos with expert narration and analysis.

IC37 - "CHRONIC RED EYE-UNRAVELING THE CLINICAL PUZZLE AND DILEMMA"

CATEGORY : OCULAR SURFACE AND EXTERNAL DISEASE

Chief Instructor : Dr. Mangala P

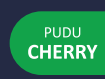

Chronic red eye refers to a persistent and ongoing condition characterized by redness, inflammation, and discomfort in eyes. It is a common condition that can be caused by various factors, diseases, medications etc. It is always the biggest challenge in finding out the cause and the right treatment. Chronic red eye can lead to severe symptoms blurred vision sensitivity to light and has impact on quality of life and daily activities, If left untreated this can lead to complications such as corneal ulcers or scarring vision loss or impairment etc. Treatment options for chronic red eye depend on the underlying cause which include artificial tear to immunomodulators. This instructional course highlights the challenges in diagnosing various causes of chronic red eye and the management of this complex disease.

Talk	Topic	Speaker	Duration
1	Ligneous Conjunctivitis – Key note address	Dr. Srinivasan M	12 mins
2	Beyond redness- Uncovering the complexity of cicatricial conjunctivitis	Prof. Vanathi Murugesan	10 mins
3	Treating the root cause- Immune mediated conjunctivitis and blepharitis.	Dr. Revathi Rajaraman	10 mins
4	Understanding and managing allergic conjunctivitis	Dr. Radhika Natarajan	10 mins
5	Dry eye syndrome is a multifaceted approach.	Dr. Mangala P	10 mins

IC19 - CATARACT SURGERY WITH VITREOUS DISTURBANCE

CATEGORY : CATARACT

Chief Instructor : Dr. Chitra Ramamurthy

This instruction course would discuss threadbare the quintessential issue of vitreous disturbance in cataract surgery and how best to optimize the end results. The course would start off discussing the strategic key points of a complete anterior vitrectomy in cataract surgery. It would detail on how best to cope in the absence of vitreous disturbance, setting parameters for AV, use of tricort, when and how, and the alternative approach of pars Plana vitrectomy. It would move on to management strategies in the eventuality of nucleus drop in different case scenarios. PCR management pearls in different settings would be discussed in detail for a more cohesive understanding. IOL manipulations in the presence of PCR would throw light on the alternative approaches that throw up & how best to salvage each setting. The course would conclude elaborating on cataract surgery in the silicon oil filled eyes & how the sequence of events need to be modified to get the best of each of these moments.

Talk	Topic	Speaker	Duration
1	Management Pearls for anterior vitrectomy	Dr. Raksheeth Nathan Rajagopal	10 mins
2	Management strategies in the eventuality of nucleus drop	Dr. Chitra Ramamurthy	10 mins
3	PCR management strategies - Different flavours	Dr. Shreyas Ramamurthy	10 mins
4	IOL manipulations in the presence of PCR	Dr. Ramamurthy D	10 mins
5	Cataract surgery in silicon oil filled eyes	Dr. K. Shreesha Kumar	10 mins

IC6 - THE OTHERS - NON-INFLAMMATORY OPTIC NEUROPATHY

CATEGORY : NEURO-OPHTHALMOLOGY

Chief Instructor : Dr. Madhumita Gopal

Most ophthalmologists are well informed regarding optic neuritis, it's recent advances and treatment. When an MRI shows T 2 hyperintensity of the optic nerve, it is usually considered to be due to optic neuritis and treated for the same. A recent study published in the Journal of Neuro Ophthalmology showed however that only 141 of 583 (24%) of eyes with optic nerve hyperintensity were caused by inflammation that is optic neuritis. When it comes to non inflammatory optic neuropathies, general ophthalmologist are less sure regarding the diagnosis, evaluation and treatment. We aim to address the same by presenting on drug (ATT and cancer chemotherapy) related, radiation induced, compressive, and inherited optic neuropathies along with recent advances in the management of traumatic and ischemic optic neuropathies.

Talk	Topic	Speaker	Duration
1	Compressive Optic Neuropathy	Dr. Nirmala Devy	10 mins

[Ic49] - THE PRECISION PATH IN

STRABISMUS SURGERY: FROM BASICS TO BRILLIANCE

CATEGORY : STRABISMOLOGY

Chief Instructor : Dr. M. Ram Prakash

This session will provide practical strategies for managing strabismus, designed for both novice and experienced surgeons. Focusing on advanced surgical techniques, we will explore a variety of approaches for addressing significant deviations, including muscle transpositions and adjustments. The course will emphasize real-world applicability, offering step-by-step guidance on decision-making, surgical planning, and execution. Surgical videos and clinical case examples will be integrated throughout, demonstrating techniques in action and highlighting key considerations. By the end of the session, participants will gain a deeper understanding of how to approach Strabismus cases with confidence, improving their surgical skills and patient outcomes, regardless of their experience level. This practical approach ensures that all attendees leave with actionable knowledge they can apply in their own practice.

Talk	Topic	Speaker	Duration
1	Perfecting Incisions in Strabismus Surgery: Techniques for the Ideal Bite	Dr. M. Ram Prakash	8 mins
2	Practical Strategies for Managing Large-Angle Strabismus	Dr. Muralidhar Rajamani	8 mins

[IC25] - STRATEGIES FOR SAFE PHACO IN ROCK HARD CATARACTS

CATEGORY : CATARACT

Chief Instructor : Dr. Sujatha Mohan

Performing cataract surgery in patients with extremely dense rock-hard cataracts is very challenging. These highly dense opaque cataracts make perioperative visualization of the capsule difficult. These lenses are hard to maneuver and typically occupy a larger volume. The lens capsule is thin and fragile, zonules are weak. This type of cataract requires longer phaco times and higher energy levels. Some of them are associated with small pupils and other situations like zonular dialysis. To get favourable outcomes in these patients often a combination of technique and technology is required.

Talk	Topic	Speaker	Duration
1	Small Pupil in Hard Cataracts	Dr. Sujatha Mohan	10 mins
2	Management of Hard Cataract using Femto	Dr. Mohan Rajan	10 mins
3	Zonular Dialysis Management in Hard Cataracts	Dr. Haripriya Aravind	10 mins
4	Management of Mature and Hard Cataracts	Dr. M. Nivean	10 mins

IC36 - MEDICOLEGAL CHALLENGES: SIGHT, RIGHTS, AND LEGAL FIGHTS

CATEGORY : PRACTICE MANAGEMENT

Chief Instructor : Dr. Nirmal Fredrick T

In today's rapidly evolving field of ophthalmology, practitioners not only face the challenge of keeping up with technological advancements but also navigating an increasingly complex medicolegal environment. This course is tailored to provide ophthalmologists with the critical knowledge and tools needed to meet these challenges head-on. It emphasizes maintaining high legal and ethical standards in clinical practice. Designed to impart a thorough understanding of the medicolegal aspects of eye care, this IC dives into topics such as statutory compliance, informed consent, and role of ophthalmologists as expert witnesses. It also covers strategies for managing legal risks and draws lessons from actual case studies. This IC is structured to bolster the ophthalmologists' confidence in their practice, to deliver patient care while adhering to legal requirements. Through this course, participants will gain invaluable insights that bridge the gap between practice and legal prudence

Talk	Topic	Speaker	Duration
1	Statutory and Legal Requirements for an Eye Hospital	Dr. Nirmal Fredrick T	10 mins
2	Consent and its Cruciality	Dr. Sathian N	10 mins
3	Role as Expert Witness and its Nuances	Dr. Niranjan Karthik	10 mins

[IC11] - MANUAL SMALL INCISION CATARACT SURGERY (MSICS) IN CHALLENGING SITUATIONS

CATEGORY : CATARACT

Chief Instructor : Dr. Shivkumar Chandrasekaran

Cataract surgery, today, is considered a refractive surgery, and phacoemulsification is the procedure of choice for almost all types of cataract and all grades of nuclear sclerosis. However, there are certain situations and certain types of cataract which require a high degree of skill, adjuvants and advanced phaco machines to perform the procedure safely and effectively. In those challenging situations, MSICS can be safely performed providing a satisfactory outcome to the patient. In this course we aim to present tips on performing MSICS in a few challenging situations like in small pupils, brunescant and mature cataracts, traumatic cataracts, and Lens Induced Glaucoma.

Talk	Topic	Speaker	Duration
1	Introduction	Dr. Shivkumar Chandrasekaran	2 mins
2	MSICS in small pupils	Dr. Shivkumar Chandrasekaran	10 mins
3	MSICS in brunescant cataracts	Dr. Sankarananthan	10 mins
4	MSICS in subluxated and traumatic cataracts	Dr. Shekhar Madhu	10 mins
5	MSICS in mature and intumescent cataracts	Dr. V.R. Vivekanandan	10 mins
6	MSICS in Phacomorphic and Phacolytic glaucoma	Dr. Sherin Haroon	10 mins

[IC48] - RHEGMATOGENOUS RD SIMPLIFIED: MANAGEMENT OF SIMPLE TO COMPLEX CASES

CATEGORY : VITREO RETINAL DISEASES

Chief Instructor : Dr. Amit Kumar Deb

Rhegmatogenous retinal detachment (RRD) was once considered a blinding disorder. Jules Gonin in 1929 first proposed that retinal break is the cause of RRD, and advocated the treatment modality of 'ignipuncture-coagulations'. Treatment options for RRD have constantly evolved since then. Current treatment options for RRD include pars plana vitrectomy with tamponade (gas or silicone oil), scleral buckle with/without SRF drainage, combined PPV with encircling band, etc. The steps of PPV and scleral buckling are often complex and difficult to understand. This IC is being proposed to be conducted by experienced VR surgeons with an aim to give an overview of the evaluation of RRD and simplify and demystify the various complex steps involved in PPV and scleral buckling. This IC will also provide an overview on the management of complex RRDs like GRT-RD, RD with macular hole, RD with PVR, re-detachment cases etc.

Talk	Topic	Speaker	Duration
1	RRD – management options and the treatment principles	Dr. Karthikeyan .K	8 mins
2	Management of simple RRD- basics of PPV, tips & tricks.	Dr. Amit Kumar Deb	8 mins
3	Management of GRT-RRD	Dr. Karthik Kumar . A	8 mins
4	Management of myopic RRD	Dr. Renu Puthenvilayil Rajan	8 mins
5	Management of RD with PVR (2 stage Sx, role of methotrexate)	Dr. Naresh Babu	8 mins
6	Scleral buckle: Basics, tips and tricks.	Dr. Shreyas T S	8 mins
	DISCUSSION

[lc31] - HOW TO HANDLE UVEITIS PATIENTS: A STEP-WISE APPROACH OF DIAGNOSIS AND MANAGEMENT

CATEGORY : UVEA

Chief Instructor : Dr. Jyotirmay Biswas

Uveitis is relatively uncommon and a complex disease comprising of 80 possible etiologies. These diseases often have protean manifestations with varying grades of severity. It can be infectious or non-infectious. It can cause substantial visual loss, even blindness if not treated promptly and properly. It often poses a challenge to the general ophthalmologist regarding the diagnosis, selection of investigations and management. This instruction course will provide an algorithmic approach in diagnosis and management of anterior uveitis, intermediate uveitis, posterior uveitis, panuveitis and retinal vasculitis. It will also give guidelines which patient and when they should be referred to uveitis specialist. Uveitis experts will discuss with representative cases highlighting the salient points followed by interactive discussion with the audience.

Talk	Topic	Speaker	Duration
1	Anterior uveitis Don't think so simple	Dr. Bhuvaneshwaran Vedapuri Eswaran	8 mins
2	Intermediate uveitis: An enigma	Dr. Jyotirmay Biswas	8 mins
3	Panuveitis - vision threatening uveitis	Dr. Sudharshan S	8 mins

[IC50] - PAEDIATRIC OPHTHALMOLOGY FOR GENERAL PRACTITIONERS

CATEGORY : PAEDIATRIC OPHTHALMOLOGY

Chief Instructor : Dr. Ankita Bisani

The general practitioner may also encounter pediatric cases, so understanding the basics of pediatric eye care is essential. Early identification of eye disorders and initiation of management, particularly in the critical period of visual development, is important in children to prevent long term effects like amblyopia that can lead to permanent vision loss. This course aims to familiarize the general practitioner with the appropriate screening and management strategies for common pediatric eye conditions like refractive errors, amblyopia, allergic conjunctivitis, strabismus and controlling progression of myopia so that they can screen children for eye problems and initiate management and refer to pediatric ophthalmologists when necessary

Talk	Topic	Speaker	Duration
1	Understanding Amblyopia and its management	Dr. Saranya S	8 mins
2	Holistic management of allergic conjunctivitis in children	Dr. Marie Fredrick Mouttapa	8 mins
3	Refractive errors and spectacle prescription in children	Dr. Janani Rajendran	8 mins

EXAM IN EVERYDAY PRACTICE: TIPS & TRICKS FOR EFFICIENT MANAGEMENT

CATEGORY: NEURO-OPHTHALMOLOGY

Chief Instructor : Dr. Muralidhar R

This course begins by distinguishing neuropathies from myopathies, using clinical videos to highlight key diagnostic signs. It covers visual pathway lesions, with real-world clinic examples, and provides an SOP for both general ophthalmologists and specialists. Recognizing subtle orbital signs can be life- and vision-saving, and expert tips help with accurate diagnosis. Recent advances in optic neuritis management, including MOG and NMO antibody discoveries, are illustrated with clinical cases. Emergencies in neuro-ophthalmology often present subtly, requiring keen observation for timely management. The algorithm is simplified for the comprehensive ophthalmologist. Updates on paralytic strabismus management are shown with photos and videos. The course also addresses the rise in ethambutol optic neuropathy due to changes in antitubercular treatment, offering guidance to general ophthalmologists to identify and manage this potentially disastrous condition.

Talk	Topic	Speaker	Duration
1	Decoding the Ocular motility puzzle: Essential insights	Dr. Muralidhar R	7 mins
2	Mapping the visual pathway: end to end solutions	Dr. Navin Jayakumar	7 mins
3	The orbit in Neuroophthalmology: A Pandora's box	Dr. Vidhya Nagasubramanian	7 mins
4	Optic Neuritis: The way forward from ONTT	Dr. Vijay Ananth J	7 mins
5	Emergencies in Neuroophthalmology: Unravelling sinister signs	Dr. Ambika S	7 mins

IC9] - GLOBAL STANDARDS FOR COLOUR-CODING CASE FILES

CATEGORY: COMPREHENSIVE OPHTHALMOLOGY

Chief Instructor : Dr. Kalpana Suresh

We live in an era where perfect documentation of case findings is absolutely essential be it electronic or case records. It is all the more important because of various medico-legal issues and litigations. This Instruction course aims at imparting knowledge on how to document the important clinical findings. Simple colour coded sketches are used to transfer all the findings from the patients to the paper. All the sub-specialty cases are dealt with which includes cornea, ocular surface, glaucoma, retina, neuro-ophthal, squint, orbit & oculoplasty. These colour coded diagrams are internationally acceptable. It also emphasizes the importance of observation skills of the person while making a diagnosis as well as follow up. These tips will go a long way perfecting entries in medical records. This also is a cost effective method of documenting the findings. The faculty includes Professors and Senior Consultants with decades of experience in University based teaching institutes.

Talk	Topic	Speaker	Duration
1	Retina	Dr. Manoj Khatri	10 mins
2	Glaucoma	Dr. Nirmal Fredrick	10 mins
3	Cornea & Ocular surface	Dr. Kalpana Suresh	10 mins

[IC15] - PRECISION, PASSION, PERFORMANCE: MASTERING MSICS TECHNIQUES

CATEGORY: CATARACT

Chief Instructor : Dr. Vijhaya Priya T

Why this course should be taught bridging the gap in cataract surgery: MSICS is a crucial alternative in high-volume surgical settings and areas with financial or technological constraints. Global relevance: Many regions with high cataract burdens lack the resources for phacoemulsification, making MSICS a vital technique. Proven efficacy: MSICS can provide visual outcomes comparable to phacoemulsification, with faster recovery and lower costs. Applicable across all settings: Whether in high-volume camps, teaching hospitals, or private practices, MSICS is a versatile skill that enhances a surgeon's repertoire. Comprehensive training & expert-led instruction: by experienced cataract surgeons who will provide step-by-step guidance Conclusion : This instruction course provides comprehensive training, enhances surgical skills and confidence to deliver high-quality cataract surgery, promotes sustainable eye care services and support continuing professional development for Ophthalmologists

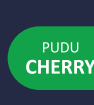

Talk	Topic	Speaker	Duration
1	Optimizing Wound Construction for Better Outcomes in MSICS	Dr. Vijhaya Priya T	8 mins
2	Capsulotomy techniques & Hydrodissection procedures - The Dynamic Duo	Dr. Amudha P	8 mins
3	Nucleus Navigation: Safe and Effective Prolapse and Extraction in SICS	Dr. Jayasri .P	8 mins
4	Complication Prevention and Management in MSICS : Best Practices and Expert Insights	Dr. Malarmozhie R	8 mins

[IC20] - BEYOND APHAKIA: SECONDARY IOL IMPLANTATION STRATEGIES AND TECHNIQUES

CATEGORY: CATARACT

Chief Instructor : Dr. Jebinth Brayan

This instruction course explores the latest strategies and techniques in secondary IOL implantation for aphakia management. Topics include preoperative evaluation, patient selection, and decision-making for the optimal secondary IOL approach. Experts will discuss sulcus placement and IOL exchange, followed by in-depth sessions on iris-sutured, iris-claw, and scleral-fixated IOLs, covering surgical techniques, intraoperative challenges, and complication management. The course will feature real-world surgical cases, video demonstrations, and a panel discussion to enhance interactive learning. Special emphasis will be placed on choosing the right technique based on ocular anatomy, surgical expertise, and long-term safety. Attendees will gain practical insights for improved patient outcomes, making this session ideal for ophthalmic surgeons seeking to refine their skills in managing aphakic eyes with or without capsular support.

Talk	Topic	Speaker	Duration
1	Technique Selection	Dr. Joe Christopher	8 mins
2	Sulcus Placement & IOL Exchange	Dr. Navaneeth Kumar	8 mins
3	Iris-Sutured IOLs	Dr. Shekhar Madhu	8 mins

**lc58: TRANSITIONING FROM LASIK TO SMILE :
OPTIMISE OUTCOMES WITH SMALL INCISION LENTICULE EXTRACTION**

CATEGORY: CATARACT

Chief Instructor : Dr. Aadithreya Varman

Small Incision Lenticule Extraction is now gaining popularity as a modality in the correction of myopia and myopic astigmatism. When a surgeon transitions from LASIK to SMILE, there are some technical challenges that one needs to overcome to deliver optimal outcomes. The IC will start with presenting data on SMILE from a high volume centre which will provide data to the audience for them to consider transitioning to SMILE. We will then address patient selection and pre op evaluation. The course will then move on to addressing optimal energy settings for SMILE and correcting high cylinders. Technical execution will be divided into three parts. 1) Ocular surface preparation 2) Docking 3) Lenticule dissection technique. We will then move on to addressing complications. SMILE Xtra will be discussed (patient selection and technical execution) . At the end of course the attendees will be well equipped with all the nuances related to SMILE

Talk	Topic	Speaker	Duration
1	Why transition to SMILE?	Dr. N.V. Arulmozhi Varman	10 mins
2	Docking and cyclotorsion control	Dr. M Nishanth	10 mins
3	Lenticule dissection technique	Dr. Aadithreya Varman	10 mins
4	Complications and management	Dr. Ramya Sampath	10 mins

**[IC29] - RECENT UPDATES IN KERATOCONUS MANAGEMENT:
WHAT'S NEW AND HOW IT HAS MAXIMIZED THE CLINICAL OUTCOMES****CATEGORY: CORNEA****Chief Instructor :** Dr. Prabhu Vijayaraghavan

Keratoconus is well known for its diversity in presentation like, 6/6 unaided vision in Sub clinical cases to few meters of vision in very advanced stages. So in such a variety of presentation only two treatment options like Collagen Cross Linking or DALK looks inadequate. Moreover, nowadays we have started facing the unfavorable long-term consequences of the above two. Hence the customization of the treatment plan for that particular clinical presentation worked well with excellent visual outcomes, and an insight into preventing long term side effects has become a part of routine practice. Over years Corneal surgeons with vast experience in handling such clinical scenarios are now pretty clear in what they are handling with. So, this Instruction course is aiming at educating the clinical practitioners, the various recent trends in managing Keratoconus and also will emphasis on preventing unfavorable outcomes of Collagen Cross Linking.

Talk	Topic	Speaker	Duration
1	Phototherapeutic Keratectomy with Corneal Collagen Crosslinking- When, when not to & how to do it?	Dr. K.S.Siddharthan	10 mins
2	CAIRS: Indications, Protocols, Technique and Outcomes	Dr. Vandhana Sundaram	10 mins
3	Lamellar Keratoplasty: What's new & how it has maximized visual outcomes...	Dr. JK Reddy	10 mins
4	Phakic IOL's in Keratoconus: Can it be a perfect choice in select situations? Pearls in planning it	Dr. Shreyas Ramamurthy	10 mins
5	Complications of Corneal Collagen Crosslinking: Pearls to avoid it, Clues to manage it, if happened	Dr. Prabu Vijayaraghavan	10 mins
	PANEL DISCUSSION		

72nd ANNUAL CONFERENCE OF TNOA
PUDU CHERRY EYE CON 2025

CHERRYCON PAPER PRESENTATION

PAEDIATRIC OPHTHALMOLOGY & STRABISMUS

Chairperson : Dr. Gayathri Panicker

Co-Chairperson :

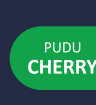

Moderator : Dr. Jayasree P

FP No.	Topic	Presenting Author
FP382	Accuracy of intraocular(IOL) power formulae- a prospective study in older children (5- 15 years)	Dr. Shilpa Rao G S3103
FP22	Role of repeat Haemoglobin levels in infants with Retinopathy of Prematurity (ROP)	Dr. Sivaranjani S S2317
FP465	Comparing Accommodation lag in myopic children using MEM retinoscopy/Open field autorefractometer.	Dr. Gayathri B G3632
FP111	A cross-sectional study evaluating factors contributing to cerebral visual impairment in children.	Dr. Lavu Sowmya
FP182	Occurrence of Refractive Errors(Re) in Siblings in Paediatric Cases	Dr. Aditya Ravindran A4306
FP103	Bridging Gaps in ROP: Assessing awareness and Practices Among Paediatrics and OBG Postgraduates	Dr. Rahamath Nawaz Shaik R3973
FP95	Unusual presentation of Syndromic Myopia!	Dr. Aastha Bansal A4371N
FP421	Retrospective Comparison of effect of steroids in postoperative squint surgery patients	Dr. SivarajaGowthaman A S2364

72nd ANNUAL CONFERENCE OF TNOA
PUDU CHERRY EYE CON 2025

AUGUST 1ST, 2ND, 3RD 2025 AT SUGANYA CONVENTION CENTRE & HOTEL SUNWAY MANOR, PUDUCHERRY.

SATURDAY - 2ND AUGUST 2025, 12:00 – 12:55 PM

UPDATE IN RETINAL VASCULAR DISEASES

Chairperson : Dr. Meena Chakrabarti

Co-Chairperson : Prof. Rajashekhar, Dr. Karthik Kumar, Dr. Jayaprakash

Moderator : Dr. Ajax Jossy

Sr No.	Topic	Presenting Author	Duration
1	Debate: FFA vs OCTA in DR Management:	Dr. Dhipak Arthur (FFA) vs Dr. Sristhi Ramamurthy (OCTA)	4+4 mins
2	Advances in retinal lasers: indications and techniques.	Dr. Ashok Kumar	6 mins
3	How do I treat my patient with DME? various choices- case based discussion	Dr. Manavi Sindal	6 mins
4	Debate: Recalcitrant DME: Switch to steroids vs alternate anti-VEGF agent (4+4+ 1= 9 min)	Prof Rajashekhar (steroids) vs Dr. Koshal Ram (anti VEGF)	4+4 mins
5	Newer anti-VEGFs in the armamentarium for DME management.	Dr. Ezhilvathani	6 mins
6	Ranibizumab PFS - Compelling leap ahead (Sponsored Talk)	Dr. Manavi Sindal	6 mins
	PANEL DISCUSSION		

72nd ANNUAL CONFERENCE OF TNOA

[IC54] - GLAUCOMA CONUNDRUMS: WHERE THE MARGINS BECOME BLURRED!

CATEGORY : GLAUCOMA

Chief Instructor : Dr. Parivadhini A

This IC will focus on less explored areas of glaucoma, where we are puzzled about the diagnosis because of the overlapping findings. This IC will help us to look beyond glaucoma in special situations like progressing glaucoma despite IOP control, role of genetic testing, sleep apnea and nutrition in glaucoma, importance of neurovascular dysfunction and few rare forme fruste conditions in glaucoma. These conditions are always perplexing in diagnosis and management. This IC with the help of cased based presentations. appropriate clinical photos/ investigations and videos when necessary will show how to diagnose and differentiate from other differentials. This IC will have ample time for panel discussion which will be helpful for postgraduates, general ophthalmologists and glaucoma specialists in recognition and management of these rare and difficult situations.

Talk	Topic	Speaker	Duration
1	Progressing glaucoma - Looking beyond the known!	Dr. Parivadhini A	10 mins
2	Exploring the unexplored - Sleep Apnea	Dr. Divya shetty	10 mins
3	Neurovascular dysfunction in Glaucoma	Dr. S. V. Nagalekshmi	10 mins
4	Nutrition and Glaucoma	Dr. Smita Panda	10 mins
5	Forme Fruste conditions in glaucoma - To Treat or Not to Treat ?	Dr. Rathini Lilian David	10 mins

Ic59] - ESSENTIAL KNOWLEDGE AND MANAGEMENT OF RETINOPATHY OF PREMATURITY FOR GENERAL OPHTHALMOLOGISTS

CATEGORY : VITREO RETINAL DISEASES

Chief Instructor : Dr. Sivadarshan M

Retinopathy of Prematurity (ROP) is a leading cause of preventable childhood blindness, primarily affecting preterm infants. Early diagnosis and treatment are crucial to prevent severe visual impairment. As the incidence of ROP increases globally, general ophthalmologists play an essential role in the timely diagnosis and treatment of ROP, requiring up-to-date knowledge on screening, staging, and management strategies. This course is designed to provide general ophthalmologists with a comprehensive overview of the retinal development, pathophysiology of ROP, and key risk factors contributing to the disease. Participants will gain an understanding of updated guidelines for screening, diagnosis, and treatment, focusing on laser photocoagulation and anti-VEGF therapy. By the end of the course, participants will be equipped with the necessary tools to effectively screen, stage, and manage ROP, utilizing current evidence-based practices and treatment modalities to improve outcomes.

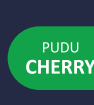

Talk	Topic	Speaker	Duration
1	Navigating Retinopathy of Prematurity: Pathophysiology, Risk Factors, Screening Criteria & Mimickers	Dr. Sivadarshan M	10 mins
2	Revised Terminology and Its Clinical Relevance: A Focus on ICROP 3 Updates	Dr. Vignesh E	10 mins
3	Optimizing Laser Treatment for ROP: Techniques and Challenges	Dr. Syed Mohideen Abdul Khadar A	10 mins
4	The Efficacy of Anti-VEGF Therapy in ROP: Indications, Benefits and Limitations	Dr. Sivadarshan M	10 mins
5	Surgical Interventions in Advanced Stages of ROP	Dr. Renu P Rajan	10 mins
	PANEL DISCUSSION

[Ic42] - AS OCT

CATEGORY : COMPREHENSIVE OPHTHALMOLOGY

Chief Instructor : Dr. Sendhamizhan Rene D

In the world of ocular diagnosis ASOCT stands as a beacon of innovation, offering unprecedented precise insights about the anterior segment. From corneal thickness measurement to angle assessment ASOCT aids in diagnosis and surgical planning. Diverse application of ASOCT in the management of ocular disorders has been under-utilized. This course is designed to delve into the multifaceted clinical application and utility of ASOCT across several critical domains such as glaucoma, corneal disorders, dry eye disorders and cataract evaluation.

Talk	Topic	Speaker	Duration
1	Basic principles and techniques of ASOCT/ clinical utility of ASOCT in cataract assessment	Dr. Ishan Tilak	10 mins
2	Clinical application of ASOCT in glaucoma disorders	Dr. Varshini O. G	10 mins

[IC46] - SECONDARY INTRACOCULAR LENS IMPLANTATION IN PAEDIATRIC APHAKIA- CURRENT PARADIGMS

CATEGORY : PAEDIATRIC OPHTHALMOLOGY

Chief Instructor : Dr. Fathima A

This course highlights the paradigms for secondary IOL implantation in challenging paediatric aphakia. Adhering to these will help the surgeon to enhance a good technical and functional outcome. While dramatic advances have occurred in this field over the past decade, some aspects of surgery, such as changing refraction and functional outcomes, continue to pose significant problems. This course intends to help a paediatric cataract surgeon decide which secondary IOL to choose in different case scenarios. With the availability of myriad IOL power methods, an experience-based talk is planned for appropriate IOL power calculation considering a myopic shift. We plan to venture into clinical case-based and video-based teaching of various positions of placement of secondary IOLs. Sulcus placement in paediatric aphakia and in traumatic cases. Iris fixation of IOLs and scleral fixation of IOL in paediatric aphakia. We will culminate in a discussion to clarify queries from the attendees.

Talk	Topic	Speaker	Duration
1	Case selection- Knowing What to select and when?	Dr. Anupama Janardhanan	10 mins
2	IOL Power Calculation in Paediatric Secondary IOLs – “Pearls and Pitfalls”	Dr. Sabyasachi Chakrabarty	10 mins
3	“Challenges and Solutions”- Sulcus Placement of IOL	Dr. R. Meenakshi	10 mins
4	"Beyond the Capsular Bag: Iris and Scleral Fixation of IOLs"	Dr. Fathima A	10 mins
5	"Secondary IOLs in Ocular Trauma: Strategies for Complex Cases	Dr. V. R. Vivekanandan	10 mins
	PANEL DISCUSSION

SQUINT, OCULOPLASTY& NEURO-OPHTHALMOLOGY

Judges : Dr. Fathima A, Dr. Jayagayathri

	Topic	Speaker
1	Child with double trouble - When in doubt go back to basics.	Dr. A. Sabarinath
2	Evisceration in a Bleeder-The Art of Managing Hemophilia with FEIBA in Ocular Emergency Surgery	Dr. R. Thenmozhi R
3	Case presentation of Centurion Syndrome: A Rare Medial Canthal Anomaly	Dr. Kavitha Ramakrishnan
4	Cherry red spot - A clue to diagnosis	Dr. Ashifa Afrin
5	"Visual world in Autism"- Unraveling the visual disabilities & ocular disorders in children with ASD	Dr. Madhumitha A
6	A Rare case of orbital Cellulitis turning into a pseudotumor of orbit.	Dr. Rita Hepsi Rani
7	A case series on pulsatile proptosis	Dr. Vigneshwari
8	Ortho-K Lenses - Ultimate Visual Edge for Sports Personnel	Dr. Aruna Rathakrishna J
9	Oculomotor apraxia : a head turner.	Dr. Krishna Murali
10	Dumbbell dermoid: How will you approach?	Dr. Sonam Nisar
11	IOID masquerading as isolated 6TH nerve palsy : A case report	Dr. Vaishaali
12	Know your anatomy – Back to the basics !	Dr. Rajalakshmi AR
13	Orbital biopsy – A key to open the Pandora's Box	Dr. Ashok Kumar M
14	The curious case of unilateral abduction deficit and how to decipher this: is it LR palsy or DRS?	Dr. Sai Thaejesvi Gopalakrishnan
15	"Eyes on the Road: A Three Years Study of Ocular Trauma in Road Traffic Accidents: Blinded by Impact"	Dr. Shastikaa N
16	Unilateral optic nerve aplasia with aniridia in an infant: A case report	Dr. Kaviyapriya N
17	Sporadic case of DOK7 mutation associated congenital 3 myasthenia syndrome	Dr. Kaviyapriya N
18	BLINDED BY THE BULGE : A CASE OF SEQUENTIAL CAVERNOUS INTERNAL CAROTID ARTERY(ICA) ANEURYSM	Dr. Kavya Annamalai
19	A Blinding Pressure: Fulminant IIH Presenting with Hemorrhagic Papilledema in a Young Male	Dr. Kalyan Basa

SUNDAY - 3ND AUGUST 2025, 12:00 – 12:55 PM

[IC 70] SIMPLE IMAGING TECHNIQUES: B-SCAN, CT SCAN AND MRI.

CATEGORY : ORBIT & OCULOPLASTY

Chief Instructor : Dr. Sonam Nisar

Orbit is a pandora's box. However, it can be very well decoded by simple imaging techniques like B-scan, CT scan and MRI. Orbital B-scan is a simple tool which every ophthalmologist can use to diagnose orbital diseases. B-scan is also useful for ultrasound guided biopsies and administration of intra-orbital injections. This IC will highlight the role of different types of imaging techniques and sequences (CT, MRI, contrast imaging, Diffusion weighted imaging, Digital subtraction angiography) which help in establishing a diagnosis in orbital diseases and also aid in assessing management.

Imaging of optic nerve has evolved over a period of time. Basics and role of OCT, MRI, CT scan, B-scan in optic nerve disorders.

Talk	Topic	Speaker	Duration
1	Orbital B-scan : Old is gold	Dr. Charanya C	12 mins
2	All about CT scan and Orbit	Dr. Kirthi Koka	12 mins
3	MRI in Orbit : The past, present and future	Dr. Sonam Nisar	12 mins
4	Imaging of optic nerve : A- Z	Dr. Vidhya Dharani	12 mins

**[Ic65] - TRANSFORMING OPHTHALMIC CARE WITH ARTIFICIAL INTELLIGENCE:
EDUCATING OURSELVES TO AI ERA**

CATEGORY : COMPREHENSIVE OPHTHALMOLOGY

Chief Instructor : Dr. Neelam Pawar

This course will introduce participants to artificial intelligence (AI) and its applications in ophthalmology. Participants will learn about the fundamentals of AI, including machine learning (ML) and deep learning (DL), as well as how these technologies are used in detecting and diagnosing eye diseases. The course will specifically focus on the application of ML in myopia, natural language processing (NLP) in microbial keratitis, and DL in glaucoma. The course's objectives are to provide insight into AI in ophthalmology, understand the basic concepts of AI, ML, and DL, and describe the current applications of AI in the field. Additionally, the course will address the potential benefits and challenges of AI in ophthalmology, along with the ethical considerations involved. Understanding these aspects will help ophthalmologists navigate the potential benefits and challenges that AI brings to their practice.

Talk	Topic	Speaker	Duration
1	Introduction to AI in Ophthalmology-Overview of AI, machine learning, and deep learning.	Dr. Neelam Pawar	10 mins
2	How LLMs are trained and how they work in microbial keratitis	Dr. Lokeshwari A	10 mins
3	Using ML to predict myopia development and progression	Dr. Neelam Pawar	10 mins
4	AI in Glaucoma screening	Dr. Nimrita Gyanchand Nagdev	10 mins
5	Ethics in AI-Limitations and potential biases of AI models	Dr. Anupama Janardhanan	10 mins
	PANEL DISCUSSION

[IC34] - ELECTROPHYSIOLOGY AND ITS CLINICAL APPLICATIONS

CATEGORY : COMPREHENSIVE OPHTHALMOLOGY

Chief Instructor : Dr. Sivaranjani S

In this instruction course we will discuss the Full field ERG, Pattern ERG, multi focal ERG, Electro oculography (EOG) and visual evoked potentials (VEP). The findings of various inherited retinal degenerations and optic neuropathies, its clinical applications will be discussed.

Talk	Topic	Speaker	Duration
1	Full field ERG-Clinical application	Dr. Sivaranjani S	15 mins
2	Pattern ERG and Multifocal ERG- Clinical Application	Dr. Saranya B	15 mins
3	Electrooculogram- Clinical application	Dr. Sumitha C	10mins
4	Visual Evoked Potential (VEP)- Clinical Application	Dr. Saradha Ravi	10 mins
